<ul style="list-style-type: none"><li>Project Management: Managing end-to-end research projects, including planning, data collection, analysis, and dissemination.</li><li>Collaboration: Working with multidisciplinary teams, external partners, or stakeholders to align research goals.</li></ul>	

## PROJECTS

---

**E-Tendering system using Blockchain Technology** (Git Repo)

- A decentralized and secure e-tendering platform leveraging blockchain technology.
- Tools used: React, TailwindCSS, Solidity, Hardhat

**Book Recommendation System** (Git Repo)

- This application uses personalized suggestions to help users choose their next favourite book.
- Tools used: React, TailwindCSS, Nodejs, Express, MongoDB, Docker

**Certificate Issuing Web Application** (Git Repo)

- A digital platform designed for issuing certificate and downloading the certificate on respected authentication.
- Tools used: HTML, TailwindCSS, Node.js, Express, MongoDB

## EXTRA-CURRICULAR ACTIVITIES

---

- NSS Volunteer for 4 years
- NGO Volunteer (H2O)
